Making a carbon-fiber bicycle frame: parts and functions

Look at the two pictures of the carbon-fiber frame production line. The left picture shows the first part of the line: the freezer, the ply cutter, the layup table with the mold and the bladder (parts 1 to 5). The right picture shows the second part: the heated press, the air compressor, the trimming machine, the ultrasonic scanner and the paint booth (parts 6 to 10). Each picture has different numbers. The numbers show the parts in the order the process uses them. Match the names in the word box to the numbers. Then write in your own words what each part does.

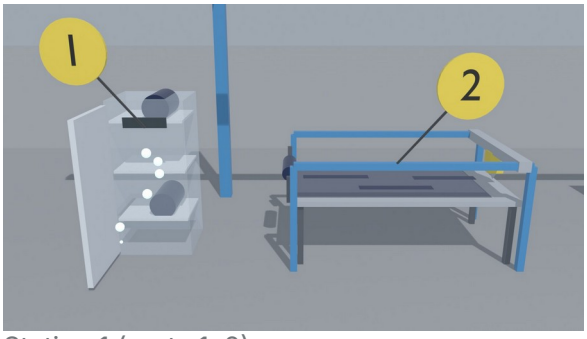

Air compressor • Layup table • Paint booth • Freezer • Bladder • Trimming machine • Ply cutter • Ultrasonic scanner • Mold • Heated press

Parts and functions

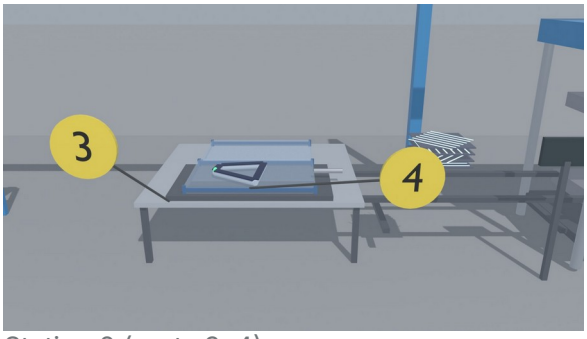

No.	Name of the part	What does it do?
1

Pictures of the seven stations

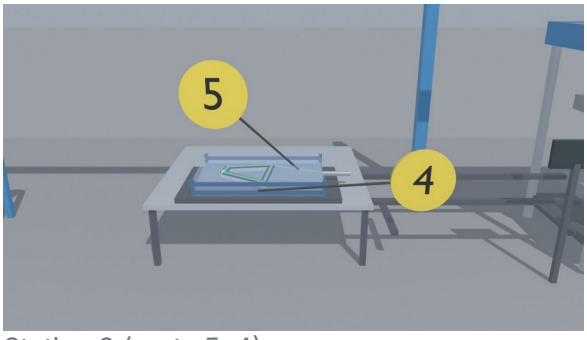

Each picture shows one step of the process. Use them to find the numbered parts. The numbers are the same as in the table on page 2.

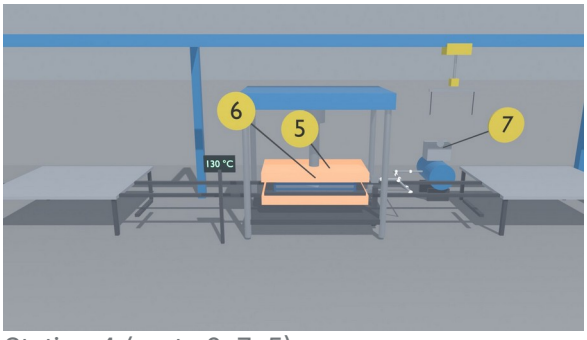

Station 1 (parts 1, 2)

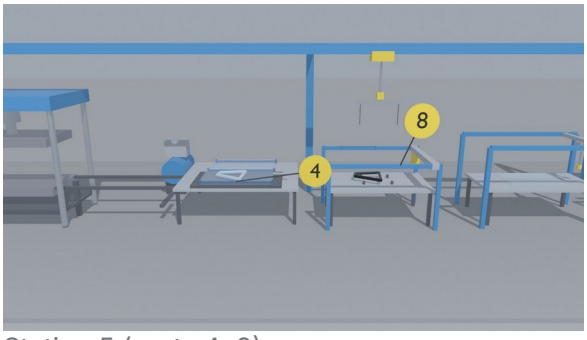

Station 2 (parts 3, 4)

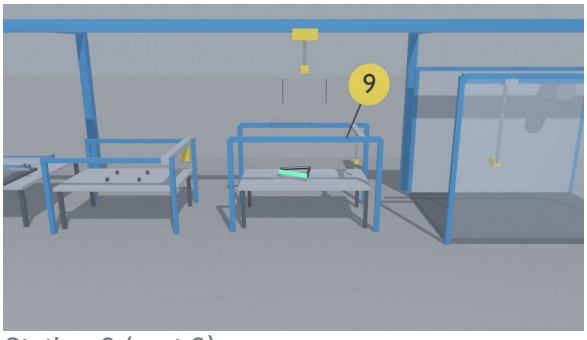

Station 3 (parts 5, 4)

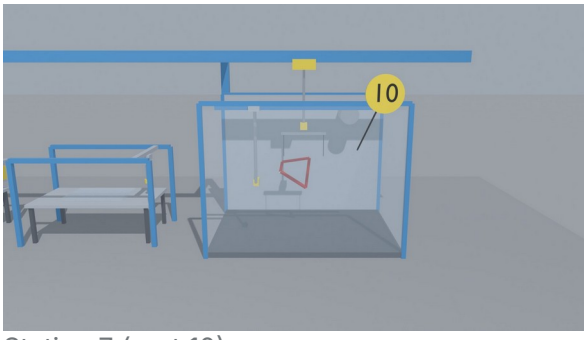

Station 4 (parts 6, 7, 5)

Station 5 (parts 4, 8)

Station 6 (part 9)

Station 7 (part 10)
