Assembling a circuit board on an SMT line: parts and functions

Look at the two pictures of the surface-mount (SMT) line. The left picture shows the first part of the line (loader, printer, inspection and the pick-and-place machine with its feeders), the right picture shows the reflow oven, the inspection, the unloader and the rework station. Each picture has different numbers. The numbers show the parts in the order the process uses them. Match the names in the word box to the numbers. Then write in your own words what each part does.

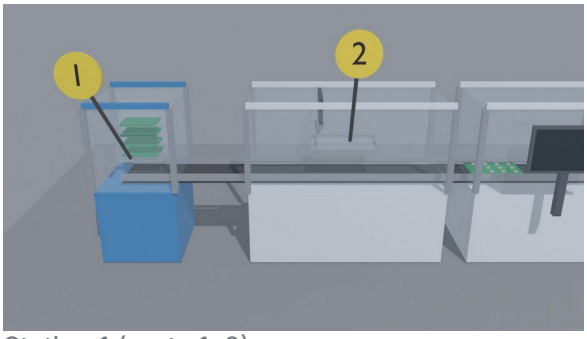

Pick-and-place machine • Unloader • Stencil printer • Cooling zone • Rework station • Board loader • Preheat zone • AOI machine • SPI machine • Peak zone • Feeders

Parts and functions

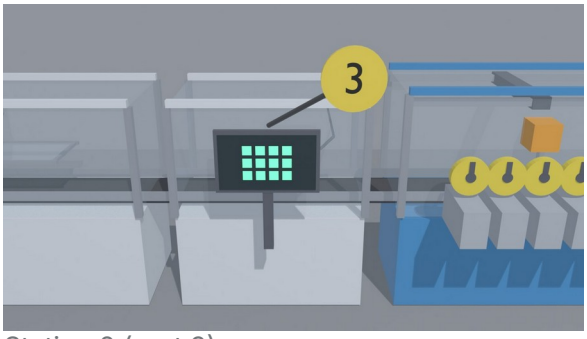

No.	Name of the part	What does it do?

Pictures of the seven stations

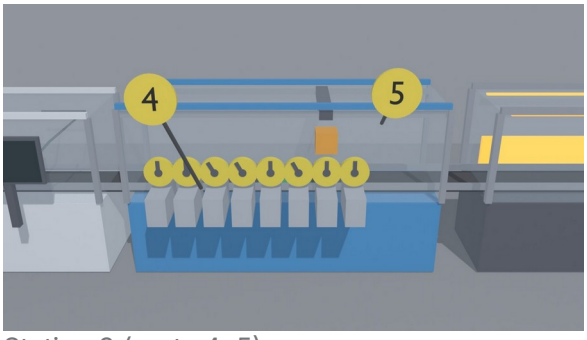

Each picture shows one step of the process. Use them to find the numbered parts. The numbers are the same as in the table on page 2.

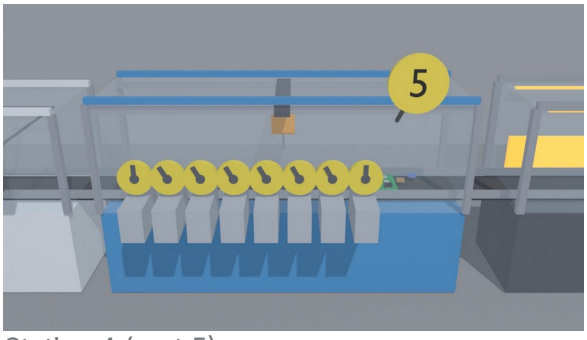

Station 1 (parts 1, 2)

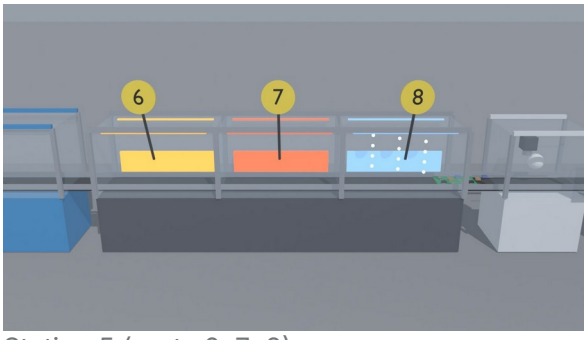

Station 2 (part 3)

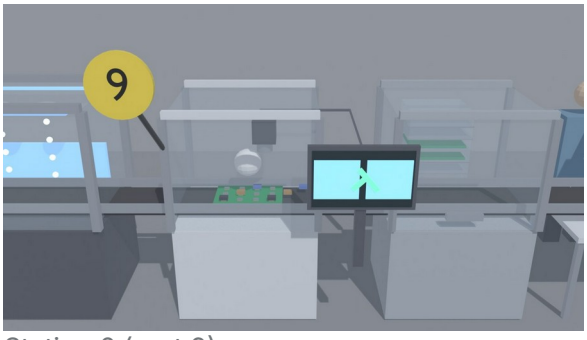

Station 3 (parts 4, 5)

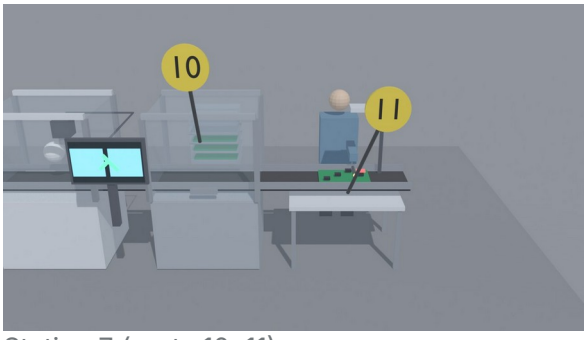

Station 4 (part 5)

Station 5 (parts 6, 7, 8)

Station 6 (part 9)

Station 7 (parts 10, 11)
