The Claus process: parts and vocabulary

Your partner is looking at a model of a sulfur recovery plant. You can see the picture below. Each part has a number. Choose the right name for each number from the word box and write it in the table. Each name is used once. Then write in your own words what each part does. Parts 5, 6 and 7 appear more than once, but they have one name only. You will use these names later when you describe the process.

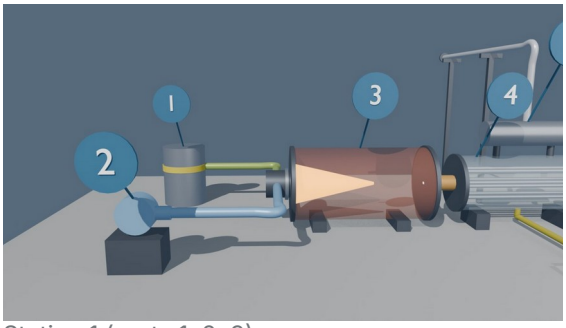

Task 1: match the names to the numbers

Word box
Stack • Reheater • Acid gas tank • Steam drum • Waste heat boiler • Air blower • Sulfur pit • Catalytic reactor • Reaction furnace • Tail gas treatment unit • Sulfur condenser

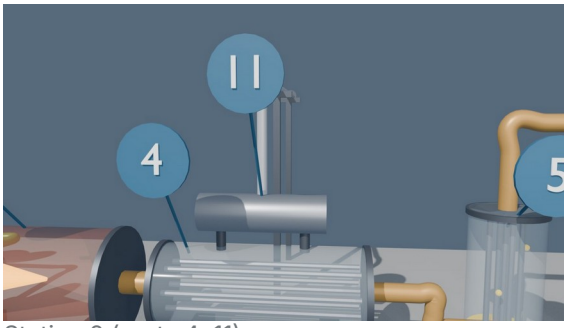

No.	Name of the part	What does it do?
1		
2		
3		
4		
5		
6		
7		
8		
9		
10		
11		

Task 2: look at each station

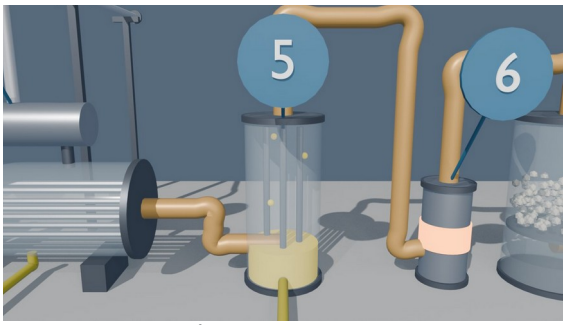

These pictures show the seven stations of the video. Check that you can find every numbered part in the stations.

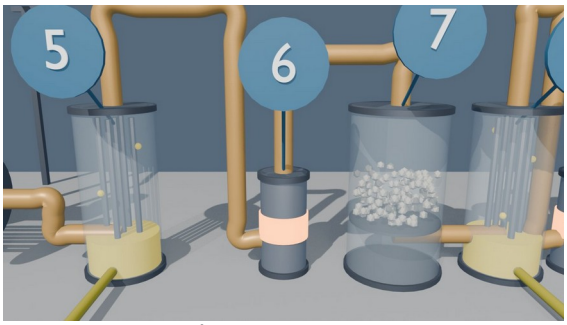

Station 1 (parts 1, 2, 3)

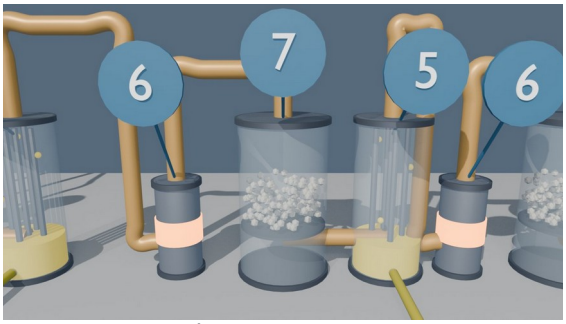

Station 2 (parts 4, 11)

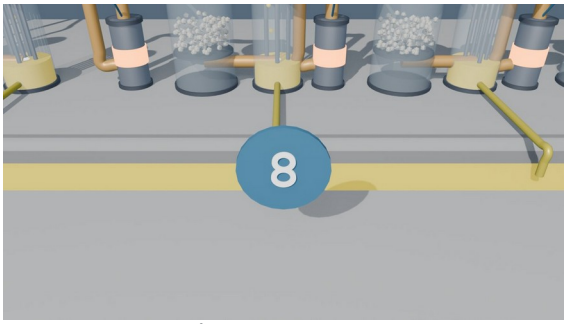

Station 3 (parts 5)

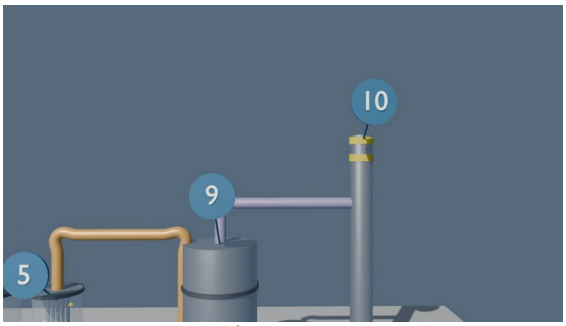

Station 4 (parts 6)

Station 5 (parts 7)

Station 6 (parts 8)

Station 7 (parts 9, 10)
