From CAD drawing to a milled part: parts and functions

Look at the two pictures of the CNC milling machine and the equipment around it. The left picture shows the whole workshop (the computer, the controller, the machine and the measuring machine), the right picture shows the inside of the milling machine behind its glass safety door. Each picture has different numbers. The numbers show the parts in the order the process uses them. Match the names in the word box to the numbers. Then write in your own words what each part does.

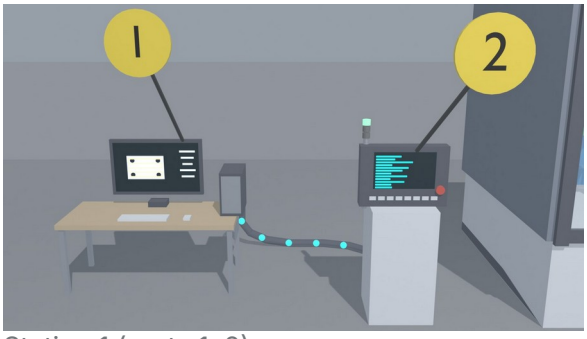

Machine table • Vise • Coordinate measuring machine • Tool magazine • CAD/CAM computer • Coolant nozzle • Tool changer • Workpiece • Chip conveyor • Probe • Controller • Spindle

Parts and functions

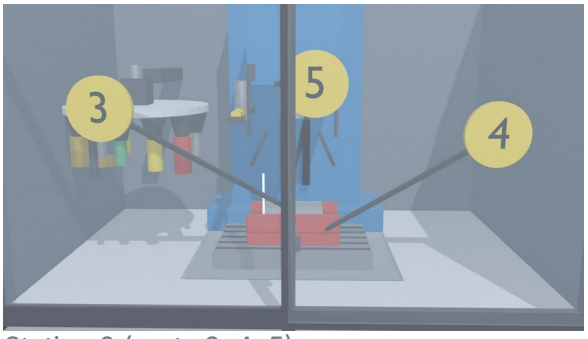

No.	Name of the part	What does it do?

Pictures of the six stations

Each picture shows one step of the process. Use them to find the numbered parts. The numbers are the same as in the table on page 2.

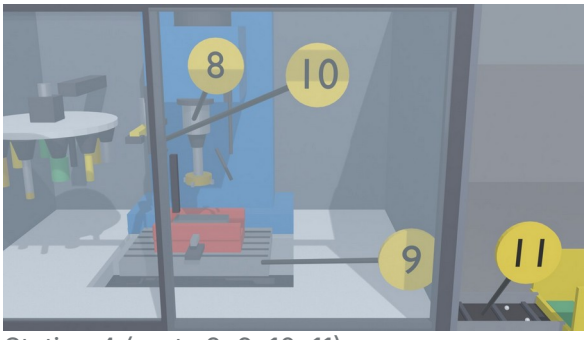

Station 1 (parts 1, 2)

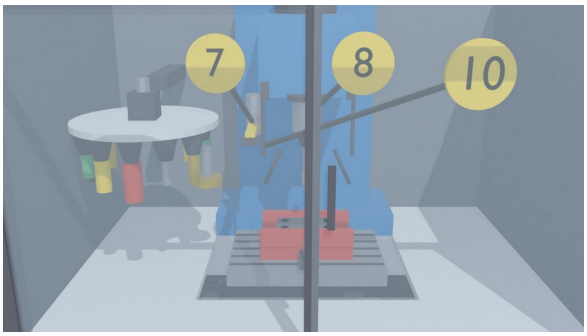

Station 2 (parts 3, 4, 5)

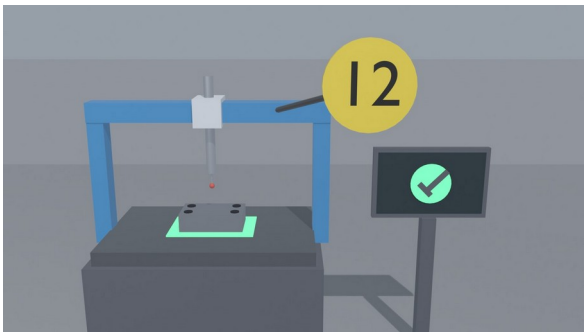

Station 3 (parts 6, 7, 8)

Station 4 (parts 8, 9, 10, 11)

Station 5 (parts 7, 8, 10)

Station 6 (part 12)
