Refueling a car with hydrogen: parts and functions

Look at the two pictures of the hydrogen station. The left picture shows the equipment that delivers, compresses and stores the hydrogen, the right picture shows the equipment at the car (the car has a transparent body, so you can see the tank inside). Each picture has different numbers. The numbers show the parts in the order the process uses them. Match the names in the word box to the numbers. Then write in your own words what each part does.

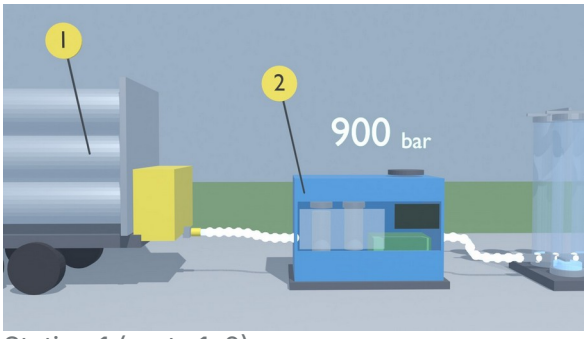

Nozzle • Chiller • Hydrogen sensor • Compressor • Breakaway coupling • Tube trailer • Vehicle tank • Dispenser • High-pressure storage • Hose

Parts and functions

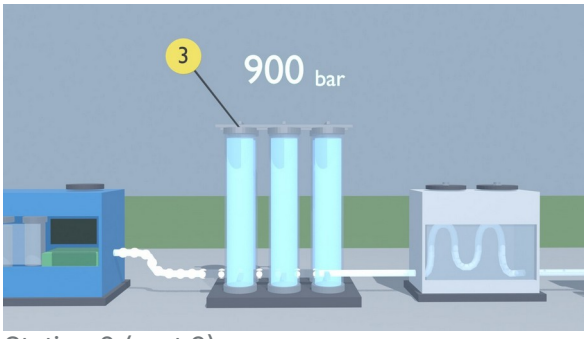

No.	Name of the part	What does it do?

10		

Pictures of the six stations

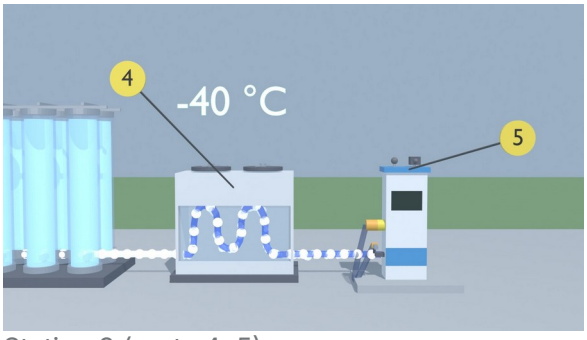

Each picture shows one step of the process. Use them to find the numbered parts. The numbers are the same as in the table on page 2.

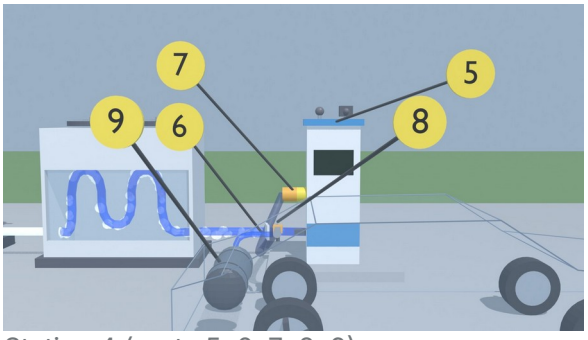

Station 1 (parts 1, 2)

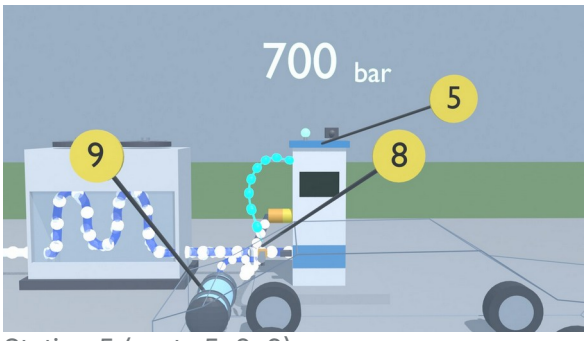

Station 2 (part 3)

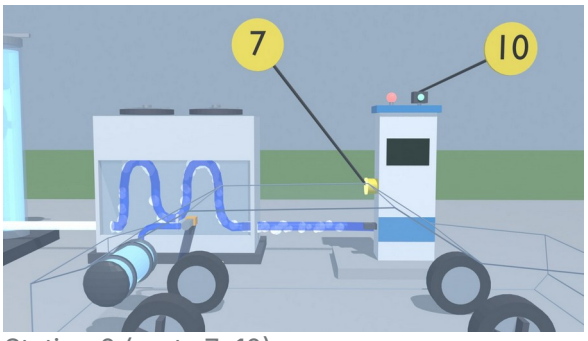

Station 3 (parts 4, 5)

Station 4 (parts 5, 6, 7, 8, 9)

Station 5 (parts 5, 8, 9)

Station 6 (parts 7, 10)
